

## WE ARE WORKING TO HELP MAKE THE CONSTRUCTION INDUSTRY A SAFER PLACE

Those in the construction industry can encounter violence and aggression from clients, contractors and members of the public. This can lead to physical harm, disrupted work schedules, decreased productivity and legal and civil breaches.

We train your staff to manage incidents, their emotions and those around them by providing you with comprehensive training solutions that ensure you and your staff are equipped to manage and respond to incidents of occupational violence and aggression.

### HOW DO WE DO THIS?

We have 5 proposed learning outcomes from each session of our fully **customisable** courses to help us create safer workplaces.

1. Understanding the concepts and application of situational awareness in current roles
2. Confirming the process for dealing with situations identified as having risk
3. Understand and apply concepts of planning and tactics for high risk activities that follow policy and procedures to make your work place compliant
4. Understanding and applying de-escalation skills to prevent incidents from occurring
5. Running scenario based incidents that empower staff to feel safer at work
